

Golang - Shart Operatorlari (Conditions)

Amaliy Mashqlar | Lesson 4

Quyidagi 5 ta masalani Golang tilida yeching. Masalalar osondan qiyinga qarab tartiblangan.

1 Toq yoki Juft?

Foydalanuvchidan bir butun son kiriting.

Agar son juft bo'lsa, ekranga "Juft son" deb chop eting, aks holda "Toq son" deb chop eting.

Maslahat: % (modul) operatoridan foydalaning.

2 Eng katta son

Foydalanuvchidan uchta butun son (a, b, c) kiriting.

Ularning ichida eng kattasini topib ekranga chop eting.

Misol: a=5, b=12, c=7 => Eng katta son: 12

Maslahat: if / else if zanjiridan foydalaning.

3 O'quvchi bahosi

Foydalanuvchidan o'quvchining bali kiriting (0 dan 100 gacha).

Balga qarab quyidagi natijani chop eting:

90-100 => "A'lo"

70-89 => "Yaxshi"

50-69 => "Qoniqarli"

0-49 => "Qoniqarsiz"

Agar kiritilgan son 0..100 oralig'idan tashqarida bo'lsa, "Noto'g'ri ball kiritildi" xabarini chop eting.

Maslahat: shartlarni tekshirish tartibiga e'tibor bering.

4 Kalkulyator

Foydalanuvchidan ikkita son va bir amal belgisi kiriting (+, -, *, /).

Amalni bajarib natijani chop eting.

Agar bo'lish amali tanlansa va ikkinchi son 0 ga teng bo'lsa,

"Nolga bo'lish mumkin emas" xabarini chop eting.

Noto'g'ri amal belgisi kiritilsa, "Noma'lum amal" deb chop eting.

Misol: 10 / 2 => Natija: 5

Maslahat: switch yoki if/else if ishlatishingiz mumkin.

5 Yil Fasli va Harorat Tavsiyasi

Foydalanuvchidan oy raqami (1-12) va havo harorati (Celsius) kiriting.

Oy bo'yicha fasli aniqlang:

12, 1, 2 => Qish

3, 4, 5 => Bahor

6, 7, 8 => Yoz

9, 10, 11 => Kuz

Golang Backend | Lesson 4 — Conditions (Shart Operatorlari)

So'ngra haroratga qarab kiyim tavsiyasi bering:

Harorat < 0 => "Issiq kiyining, qopon kiyim kerak"
